Bridgemaker
Hiring Team

Dear Bridgemaker Team,

Varun Mishra**Bridgemaker** Linienstraße 86As a passionate advocate for innovative technology and business solutions, I am excited to apply for the Intern position in AI-driven Business Building & Venture Development at Bridgemaker. Your commitment to developing and validating new business models through a unique blend of AI and entrepreneurial spirit resonates deeply with my own aspirations. I am particularly drawn to your approach of collaborating with SMEs and private equity firms to create impactful digital products, and I am eager to contribute my skills to your dynamic team.During my tenure as a Werkstudent at Conrad Electronic SE, I spearheaded the development of an intelligent automation ecosystem that successfully reduced support ticket volume by 60% for over 400 B2B partners.

This was achieved by automating KPI reporting and partner request routing using tools like Zapier and GPT-4. Additionally, I led a comprehensive UI/UX overhaul of the seller support platform, transitioning it to a user-centric design that significantly enhanced user experience.

My experience in building functional prototypes using React and Next.js has prepared me to contribute effectively to the design and implementation of digital prototypes at Bridgemaker.I have a solid foundation in UI/UX design, having owned the end-to-end design process for a social learning platform. My proficiency in Figma allowed me to deliver a complete system of interactive specifications that facilitated an on-schedule product launch. Furthermore, my freelance work as a Full-Stack Developer has equipped me with the technical skills necessary to build and maintain responsive web applications, ensuring a seamless user experience.

I am particularly excited about the opportunity to work with modern AI and design tools at Bridgemaker, as I have a keen interest in leveraging AI technologies for digital prototyping.Bridgemaker's ethos of 'fail fast, be bold' aligns perfectly with my belief in the importance of experimentation and innovation in the tech industry. I admire your commitment to providing deep insights into venture building and fostering a culture that encourages creativity and collaboration. Your recent projects, such as the development of AI-driven business models, demonstrate a forward-thinking approach that I would be thrilled to be a part of.

Yours sincerely,

VARUN MISHRA
